

# ECONOROD NEWSLETTER

## ECONOROD MOVE TO NEW PREMISES

As most of you are now aware as from the 1st October last year we have moved into our new business premises. We are still on the same Bownfields site in Welwyn Garden City but now have a much larger facility, which used to belong to the Miskin Plant & Tool Hire company, a well-known and much respected local business.

Econo Rod has now been established for over 17 years and has grown from strength to strength, over the last 2 years we have seen a significant increase in our business and decided that the time was right to move into this new facility.

The new premises will allow us to increase the office accommodation for our growing staff levels, and enable us to house our continually growing vehicle fleet, in particular our expanding Tanker Division.

In addition to the growth within our core business, the new facility has allowed us to look at expanding our services to other complimentary areas, the first of which is a vehicle valeting service "Econocar Valeting Co". This has been

a great success and has been used by businesses within the local area, and in addition to this will be an asset for our own fleet of vehicles. This can only assist us to continue to present our vehicles to the standard that

our customers have come to expect from Econo Rod.

Over the following months there will be more changes to the look and feel of the new premises as we will be carrying on with the refurbishing of the buildings internally and externally. As and when these changes

happen we will keep you up to date within our future Newsletters.

### INCLUDED IN THIS ISSUE:

- ◆ New Premises
- ◆ Expanding Tanker Fleet
- ◆ 365 days 24/7
- ◆ New Customers
- ◆ A Day in the Life of:

### NEW CUSTOMERS FOR ECONOROD:

- ◆ NCP Tanker contract confirmed

- ◆ Osborns

## EXPANDING TANKER

Owing to the ever increasing demand for our Tankers we are in the process of expanding our current fleet to accommodate this.

Econo Rod's Tanker Services range from a Vacuum Tanker to Tanker jetting units. Vacuum Tankers are used to remove solid and semi-solids from manholes, grease traps, gullies, pump sumps and petrol interceptors.

The following highlight some of the Tankers services which are available:

- ◆ 4000 gallon Super Sucker
- ◆ High Velocity Jetting Units running at 75 gallons @ 3000 psi for large diameter drains
- ◆ Available 24 hrs a day, 365 days per year at competitive prices
- ◆ All Tankers fully trackable for excellent E.T.A's
- ◆ Fully qualified operators, experienced in tanker work and drain tracing
- ◆ Experienced confined space crew
- ◆ All necessary certificates available on request.
- ◆ Deep lift suction capability
- ◆ Fleet to be increased to 10 over the next year
- ◆ All incidents covered from flooding to pollution
- ◆ Drain and sewer cleaning
- ◆ Tank and well cleaning

365 DAYS A YEAR — 24 HRS A DAY

Once again Econo Rod has shown that businesses must have all year round support, which means 365 days a year 24 hours a day. As

usual this time of the year can be a very busy time, and has proved once again that this is the case. The Christmas period confirmed this

when Econo Rod was called upon throughout Christmas Day and Boxing Day and on many occasions during the festive period.

WELCOME TO NEW CUSTOMERS

As previously mentioned within this Newsletter, this year at Econo Rod has proved to be a very successful year. With this in mind we would like to take this opportunity to welcome our most

recent customers, and thank them for entrusting Econo Rod with their drainage service requirements.

A DAY IN THE LIFE OF...

On the face of it you might think that cleaning a drain or fitting a new pipe is not much to get bothered about. When you then say that this is for an internationally recognised London hotel, and that this all has to take place while the hotel is fully operational, then that's a different matter!

Excuse the self indulgence but we

thought that this would give you a flavour of the type of jobs Econo Rod carries out on a regular basis, day in day out 365 days a year.

This particular project for a long established Econo Rod customer involved two Econo Rod Engineers took two and a half weeks to complete and when complete used two hundred and thirty feet of replacement pipe

work. This all took place prior to and immediately following the busy Christmas period while the hotel was fully operational, with the minimum of disruption to the daily working of the hotel.

So for those of you who thought Econo Rod just cleaned drains? Next time you have a project, regardless of size and complexity, talk to us and let us take the worry out of managing this for your business.

Services Available

Welcome to Econo Rod, the one stop shop for all your drain cleaning services needs.

When you talk to Econo Rod be assured that you are dealing with one of the leading drain cleaning services nationally, providing a wide range of specialist drain cleaning services to the commercial and private sector for over 17 years
